

End of week report

Hours:35

Achieved this week

- Amazon web server setup
 - Still requires proper security policies
 - Site not hosted on AWS yet (on a personal server for ease of development)
- Basic db structure created (Diagram in appendix)
- Artists can view projects and the resources (a record of so far) for those projects
- Agencies can view artists in their agency, those artists projects, the resources for those projects.
- Log in works for Artists and Agencies, (No homepage yet for admin and contractors)

Plan for next week

- Finish data presentation, extending it to admin and contractors (contractors being people who can see all the agencies but not manage user accounts)
- Make file uploader and manager
- Migrate to amazon server to be able to extend testing

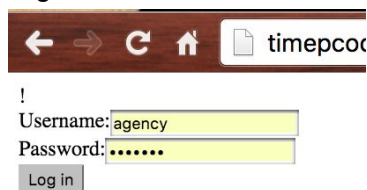

Stretch goals next week

- Add some more styling

Images of progress

No styling added yet, working on backend only.

Login

A screenshot of a web browser showing a login page. The browser's address bar displays 'timepcor'. Below the browser window, there is a form with a '!' icon, a 'Username:' label followed by a text input field containing 'agency', a 'Password:' label followed by a text input field with masked characters '*****', and a 'Log in' button.
